

## PRESS RELEASE

### Derdack SIGNAL4 Joins Microsoft Intelligent Security Association (MISA)

MISA nomination paves the way for an effective anywhere 24/7 response to security incidents and demonstrates long-term commitment to the Microsoft relationship

Richmond, May 1, 2022

Today, Derdack SIGNAL4 ([www.signl4.com](http://www.signl4.com)), provider of critical alerting and anywhere incident response for SecOps teams, announced it has joined the Microsoft Intelligent Security Association (MISA), an ecosystem of independent software vendors and managed security service providers that have integrated their solutions to better defend against a world of increasing threats.

*Matthes Derdack, CEO Derdack, states: "We are thrilled to see Derdack SIGNAL4 join MISA and are looking forward to delivering unique value to Microsoft security customers. The combination of Microsoft Sentinel and SIGNAL4 represents a unique combination to effectively handle security incidents and threats around the clock, especially addressing the needs of SecOps teams on call."*

By adding SIGNAL4 to the security incident management toolbox, businesses can achieve up to 10x faster and effective response to critical incidents, reducing the impact of security threats and attacks. When such incidents happen, SIGNAL4 bridges the 'last mile' notifying SecOps staff and responsible on-call teams, considering availability and duty schedules. SIGNAL4 notifies through persistent mobile push with mute override, text, voice calls and Microsoft Teams messages with acknowledgement, tracking and escalation. Convenient, built-in duty and shift scheduling ensure the right people are alerted at the right time.

SIGNAL4 comes with a user-friendly mobile app for Android and iOS allowing for a swift and effective response 'on-the-go' and without need to fire-up a notebook and/or 'VPN' connection. The mobile app enables to receive meaningful, enriched incident alerts, take ownership through acknowledgement, allows for annotations and status updates, automated and manual escalations to other teams as well tracking of resolution progress. All information is updated in real-time to all SecOps members and fed back into Microsoft Sentinel. This powerful connectivity is achieved through an intelligent 2-way integration utilizing Microsoft Graph API.

*"The Microsoft Intelligent Security Association has grown into a vibrant ecosystem comprised of the most reliable and trusted security software vendors across the globe. Our members, like Derdack, share Microsoft's commitment to collaboration within the cybersecurity community to improve our customers' ability to predict, detect, and respond to security threats faster." - Maria Thomson, Microsoft Intelligent Security Association Lead*
